

December 10, 2003

Ms. Marlene H. Dortch  
Secretary  
Federal Communications Commission  
445 12<sup>th</sup> Street, S.W.  
Washington, D.C. 20554

**In the Matter of**

<b>Petition of the California Public Utilities</b>	)	
<b>Commission for Authority to Implement</b>	)	<b>CC Docket No. 99-200</b>
<b>Technology-Specific Overlays</b>	)	

Dear Ms. Dortch:

Pursuant to Section 1.1206 of the Commission's rules, William L. Ball, Vice President Public Policy representing the OnStar Corporation, submits this notice in the above-captioned proceeding of an ex parte meeting on December 10, 2003, with Eric Einhorn, Scott Mackoul, Pam Slipakoff, Cheryl Callahan and Sanford Williams of the Wireline Competition Bureau. The purpose of the meeting was to demonstrate the OnStar in-vehicle telecommunications system.

The demonstration included a brief explanation that OnStar combines cellular communications, GPS technology and sophisticated voice recognition technology and integrates them into the electrical architecture of the vehicle. OnStar's service offerings were reviewed and selectively demonstrated including OnStar Personal Calling and certain OnStar call center services. OnStar's transition to digital technology also was discussed. OnStar reiterated some of the points made in its previous filings in this matter.

In response to the CPUC's reply comments, OnStar noted that in circumstances where it does not offer OnStar Personal Calling, the number assigned to the vehicle's OnStar is from Verizon Wireless' Win 4 network which is inherently a non-geographically sensitive number.

Please direct any questions regarding this matter to the undersigned.

Respectfully submitted,

William L. Ball  
Vice President, Public Policy
